

The Accelerator for Clean Air Actions (ACAAS) will support 10 cities with the knowledge and capacity needed to achieve their clean air targets.

SUPPORTED BY

Many Indian cities are facing severe air pollution with detrimental effects on human health. The National Clean Air Programme (NCAP) has spurred 131 non-attainment cities toward reducing and mitigating air pollution through their respective Clean Air Action Plans. Effective implementation of these plans requires cities to –

- ▶ Advance their technical capabilities
- ▶ Improve coordination among agencies
- ▶ Strengthen their policy frameworks
- ▶ Encourage greater citizen participation
- ▶ Better utilize funds
- ▶ Identify and scale suitable pilots

ACAAS will provide technical support and build the capacity of 10 Indian cities to plan and implement solutions towards improving air quality

OBJECTIVES

Support cities in understanding and leveraging data to create science-based projects

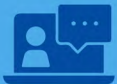

Support cities to transition from air quality action plans to impactful projects and scale-up

Equip ten cities with a nucleus of 30 changemakers to create an ecosystem for clean air actions

Create a peer platform for exchanges of learnings and best practices

CAPACITY BUILDING OF CHANGEMAKERS

Government Officials

Online Trainings

Young Professionals

Peer Workshops

Citizen Enablers

Hands-on Support

Exposure Visits

10 FOCUS CITIES

DISCLAIMER:

TWO YEARS PROGRAM

PHASE 1

Capacity Building of Changemakers

Selection and capacity building of changemakers

Strengthening of micro-action plans and identifying pilot projects

PHASE 2

Engagement with City Agencies

Data-based understanding and preparation of pilot projects

Enabling community of air quality changemakers

Engagement with concerned agencies and citizen groups

PHASE 3

Sustaining Momentum

Creating project pipeline

Proposing a policy and regulatory framework

#CleanAirForAll
